SUMMARY

Cybersecurity and IT student specializing in web application security testing and network protection. Experienced in hands-on ethical hacking, penetration testing, and secure web development. Currently preparing for CompTIA Security+ and actively practicing through platforms like TryHackMe. Passionate about helping organizations secure their digital assets through testing and secure design.

SKILLS

Cybersecurity: Penetration

Testing, Vulnerability

Assessment, Web App

Security, OWASP Top 10

Tools: Pi-hole, Burp Suite,

Wireshark, Metasploit,

TryHackMe, Raspberry Pi, Git

Programming & Web: HTML,

CSS, JavaScript, React, Vite,

Tailwind CSS, SQL

Languages: Lithuanian

(Native), Russian, English,

Spanish

EDUCATION

BSc IT Business, University of

Twente — *Expected 2026*

Focus: Technology

management, cybersecurity,

and digital transformation.

Master's in Cybersecurity —

Planned 2026+

EXPERIENCE

Pi-hole Network Security Project (2024)

Configured Raspberry Pi with Pi-hole for DNS-level ad, tracker, and malicious domain blocking. Integrated DHCP, managed custom blocklists, and enhanced network security across all devices.

Web Application Security Labs (Ongoing)

Completed 50+ challenges on TryHackMe and HackTheBox focusing on privilege escalation, exploitation, and web vulnerabilities. Applied secure coding principles and mitigation strategies for OWASP Top 10 risks.

Certifications:

- CompTIA Security+ — *Expected 2025*
- Certified Ethical Hacker (CEH) — *In Progress*
- Offensive Security Certified Professional (OSCP) — *Planned*

Additional Experience:

- **Former Professional Football Player** — Developed discipline, teamwork, and perseverance.
- **International Experience** — Adapted to multicultural environments while living and studying abroad.
