SKILLS

Cybersecurity: Penetration Testing, Vulnerability Assessment, Web App Security, OWASP Top 10

Tools: Pi-hole, Burp Suite, Wireshark, Metasploit, TryHackMe, Raspberry Pi, Git

Programming & Web: HTML, CSS, JavaScript, React, Vite, Tailwind CSS, SQL

Languages: Lithuanian (Native), Russian, English, Spanish

EDUCATION

BSc IT Business, University of Twente — Expected 2026

Focus: Technology management, cybersecurity, and digital transformation.

Master's in Cybersecurity — Planned 2026+

SUMMARY

Cybersecurity and IT student specializing in web application security testing and network protection. Experienced in hands-on ethical hacking, penetration testing, and secure web development. Currently preparing for CompTIA Security+ and actively practicing through platforms like TryHackMe. Passionate about helping organizations secure their digital assets through testing and secure design.

EXPERIENCE

Pi-hole Network Security Project (2024)

Configured Raspberry Pi with Pi-hole for DNS-level ad, tracker, and malicious domain blocking. Integrated DHCP, managed custom blocklists, and enhanced network security across all devices.

Web Application Security Labs (Ongoing)

Completed 50+ challenges on TryHackMe and HackTheBox focusing on privilege escalation, exploitation, and web vulnerabilities.

Pro Bono Web Application Security Testing (2025 – Ongoing)

Reaching out to local businesses to offer free website vulnerability testing in exchange for a review.

Certifications:

- CompTIA Security+ — *Expected 2025*
- Certified Ethical Hacker (CEH) — *In Progress*

Additional Experience:

- **Former Professional Football Player** — Developed discipline, teamwork, and perseverance.
- **International Experience** — Adapted to multicultural environments while living and studying abroad.
